Post-op Instructions for Crown Treatment

1. Our Team is always here to support you through your treatment and answer any questions or address any concerns you may have.
2. You should have an appointment scheduled to deliver your crown prior to leaving today. We will call you if we receive it early.
3. You will leave the office today with a temporary crown on the tooth that was treated.
4. Please avoid eating until the numbness is gone.
5. Please avoid eating any hard or sticky foods in the area of the temporary crown.
6. The temporary crown may be sensitive to hot and cold food and beverages.
7. The tissue around the tooth and jaw may be sore due to the procedure and injection (anesthetic). Over-the-counter Ibuprofen or Tylenol can be taken as needed.
8. Please call the office if the temporary crown comes off. You can also get a temporary cement from the pharmacy to put the crown back on until you can come into the office.
9. Please call our office if you have any questions or concerns: **(940) 321-2340**
